

Superior Performance in Nucleic Acid and Protein Quantification

spectrophotometers for fast and accurate quantification of nucleic acid and protein.

ND-3800-OD

Nano DOT Microspectrophotometer

ND-2800-OD

Nano DOT Nucleic Acid Analyzer

Standalone

Integrated Android system eliminates the need for a separate computer

7-inch touch screen

Easy and flexible operation with 7-inch color touchscreen interface

OD₆₀₀

OD₆₀₀ pre-defined program for measuring concentration of bacteria

Microvolume

Only require 0.5-2 µL samples for analysis, save your precious samples

Easy and Rapid

Simply pipette, measure and wipe clean. Fast measurement time of less than 10 seconds

No Dilution

No dilution of samples required

No Warm Up

No more waiting time to warm up lamp

Long Lifespan

Xenon flash lamp, 10⁹ flashes (up to 10 years)

Compact

Small footprint design conserves bench space

Flexible data output

Results can be printed with built-in thermal printer. Data can be exported via USB

ND-3800-OD

ND-3800-OD Nano DOT Microspectrophotometer is a robust microspectrophotometer that provides full spectrum UV-Vis analysis. The newly added application of OD₆₀₀ measurement with cuvette mode enables measuring of bacteria concentration in liquid suspension to monitor growth of bacterial cultures. Enhanced with 7-inch touch screen design and built-in Android system, it allows quick navigation of application modules, easy operation and access of data without requiring connecting to a computer.

It is an integrated system that delivers fast and reliable quantification of nucleic acid and protein with microvolume samples as little as 0.5 μ L.

ND-2800-OD

ND-2800-OD Nano DOT Nucleic Acid Analyzer is a standalone, easy-to-use and compact spectrophotometer that is ideal for quick measurement of concentration and purity of nucleic acid and purified protein samples by using 230nm, 260nm and 280nm. ND-2800-OD has been upgraded with an additional feature, OD₆₀₀ measurement, which allows quantification of bacteria concentration in liquid suspension by using cuvette.

Samples of 0.5 μ l to 2 μ l can be measured by pipetting directly onto lower pedestal without requiring absorption cell or cuvette and the results can be obtained in less than 10 seconds. The newly 7-inch colour touchscreen and intuitive graphical interface make operation easy and user friendly. Results can be printed with the built-in printer or exported via USB flash drive.

Each Standard Set Includes

- ① Main device
- ② Power adapter (DC 24V)
- ③ Mouse
- ④ Printing Paper (2 rolls)
- ⑤ Cuvettes (2 pcs)
